

SGK GOVERNMENT DEGREE COLLEGE, VINUKONDA

BEST PRACTICES(2018-19)

1.Mid day meals

2. Studio set up

3. Helping hands

4. Awareness of seasonal diseases

5. Career guidance

1. TITLE: MID DAY MEALS(SUBHOJANA)

GOAL: For stress free and happy exam preparation.

THE CONTEXT: ours is the only government college, established in 1980 to serve the higher education needs of backward palnadu region, which covers about 25 km radius. Students have poor back ground on all counts and they should also join their hands with their parents so as to meet the daily needs of the family. They have to concentrate on both studies and their livelihood as well. They have to scarify their daily wage to attend the college and keep their presence all the day long. Bringing lunch box regularly to the college is also a big challenge for them, which directly affect their studies and in directly their performance in the public examinations. To make our students overcome this problem. As college is not getting funds to focus on this need, our lecturers voluntarily came forward with a plan of providing nutritious and quality food for the students 2 months before the main examinations.

THE PRACTICE: with the the above goal, college initiated the free supply of meals for the students before the examinations, which are held on semester basis. Considering the day wise attendance percentage of the students, the quantity of food and the expense is estimated for that day. The order is given to the nearby hotel and instructed to send the meals by their vehicle at 1⁰ clock. Students are informed to gather in the college balcony downstairs and get their lunch packet.

EVIDENCES OF SUCCESS: Good idea always get paid off. The initiation tremendously worked out, students utilized the opportunity and could stay back in the college for long time and expressed their satisfaction over the noble deed and they could get enough time for preparing the examinations the same was influenced on the result.

PROBLEMS ENCOUNTERED AND RESOURCES REQUIRED: during the process of implementing the plan of action, everybody felt satisfaction for being part of this meaningful activity. The college wanted to extend this program year long, for that we need more funds. It just not needs the kind hearts, but also the ceaseless actions.

2. TITLE OF THE PRACTICE: College Studio

GOAL: to take online classes

THE CONTEXT: As students are engaged with livelihood activities, they are not actively involving in teaching and learning activities. Considering this our lecturers decided to make online video lectures, so that students can watch the video lectures leisurely for many times at their house and cope with the regular students.

DESCRIPTION: in the above context and with the above aim college resolutioned to set up a studio to make video lectures in order to make the teaching learning experience innovative as well as easily accessible for all the students. A small studio has been established with in the computer lab in a small room which is exactly adjacent to the functioning area of computer laboratory. For this a computer device with internet facility, lighting facility and a green screen were arranged. All the faculty members were trained in perfect video making with the cooperation of the lecturers who are well acquainted with the knowledge of video making. In the short time training period lecturers learned different soft wares useful for video making like screen recording, OBS, loom, screen cast-o-matic, editing tools etc., Lecturers are instructed to make videos of 15 minutes length covering all the important topics in the timings when they do not have active academic and regular work.

EVIDENCE OF SUCCESS: with all motivation and perfect learning experiences, our lecturers started making videos, which were sent to the students through college and group wise whats app groups. Students expressed their satisfaction over this practice and expected more videos on all the topics, included in the syllabus. This is just at budding stage, for the next academic year it would be done in full swing.

PROBLEMS ENCOUNTERED AND RESOURCES REQUIRED: as it is a new experience for the lecturers they need more practice on it. Lecturers must have their own set up for making videos at high pace since college has limited provisions. Lecturers faced time clash to utilize the studio resources. College still needs a spacious room and a few more systems for large scale work. In short it is a win - win situation for the students and lecturers.
